

How To Redeem A LeetCode Subscription Redeem Code

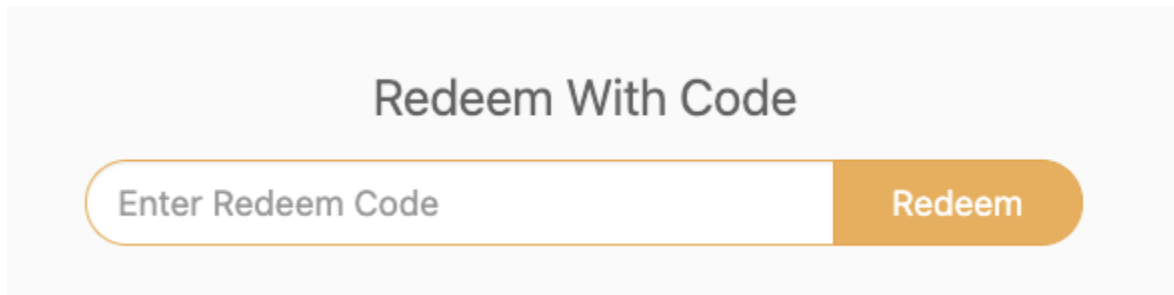

1. Enter [LeetCode.com](https://leetcode.com).
2. Sign in with your LeetCode account. If you don't have an account yet, sign up [here](#).

*No need to purchase any subscriptions by yourself.

3. Locate and click on the "Store" icon on the top of the website. On the "Store" drop down, select "Redeem".

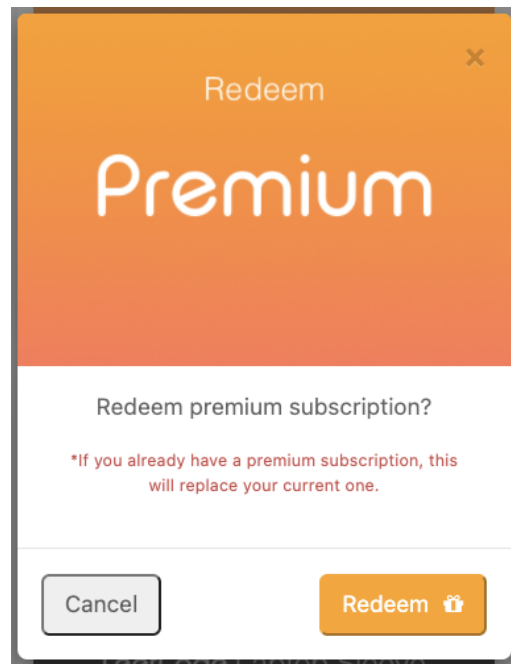

4. Scroll down on the Redeem page for the "Redeem With Code" bar.

5. Enter a Redeem Code and click "Redeem".
6. There is a pop-up from clicking on "Redeem". Please make sure to read the section written in red:

- If the user currently has an on-going subscription, redeeming this code will grant this user's account a new subscription that

replaces this account's original subscription.

7. After carefully reviewing the message, click on the lower right corner "Redeem" button to continue with the redeem process. Below is the screenshot that indicates a successful redeem. The user may also check the subscription status on the Billing page to ensure their account has successfully received the Subscription.
8. Each Subscription Code is only allowed to be redeemed once. Canceling a subscription made valid by a redeem code does not grant the user any refund. Furthermore, any LeetCode subscription cannot be paused in the middle of the subscription. For more information on the Cancellation and Refund Policy, please check it out at the end of our [Terms of Service](#) page.
9. If the user has any issues with the redeeming process or with the subscription itself, please don't hesitate to reach out to LeetCode's support team by emailing support@leetcode.com.
